

Oracle EPM / Hyperion Upgrade:

Ready to upgrade your on-premise environment(s) ?

Is it time to upgrade your on-premise Oracle EPM environments?

Perhaps your hardware is nearing its warranty expiration date?
Or your software version is soon to be unsupported?
Or Oracle has released a new version of its software that has important bug fixes or cool new features that are a must have!

BluMarble is one of the few Oracle EPM/Hyperion advisory firms who have on-premise infrastructure experience and resources that can help you with your upgrade.

Upgrading can be a challenging process.

Whether you want to upgrade to new hardware:

- Procuring/preparing new hardware (VMs) and ensuring specs are right
- Understanding the Oracle compatibility matrices
- Installing the appropriate O/S, databases and other core level software
- Installing the new version of Oracle EPM software
- Establishing database connections
- Migrating your applications
- Migrating security
- Migrating and validating data
- Testing, migration, and more testing

Not to mention that there is documentation to be produced, training to deliver, and post migration support at the ready – just in case.

Or you wish to perform an in-place upgrade:

- Backing up your environments
- Finding the right window for system downtime
- And doing it FAST so the impact on users is minimal
- With post migration support at the ready – just in case

BluMarble knows Oracle EPM

We have years of experience in performing Oracle Hyperion upgrades
We have project management & expert Infrastructure resources available to help
We can upgrade in-place, OR
Install Hyperion on new hardware, in a new environment
We will guide you seamlessly through the process to ensure a successful upgrade
We will help you with a test plan, prepare documentation, and manage any issues

For more information on upgrading your on-premise Oracle EPM environment(s), contact us for a consultation!

ABOUT BLUMARBLE:

BluMarble is a Canadian provider of Enterprise Performance Management (EPM) implementation and support services.

We understand FP&A and best practices from both the domain and technical perspectives.

We have delivered dozens of successful engagements, including upgrades.

Our skilled resources have 15+ years average tenure with the Oracle EPM product set.

We have a battle tested, EPM specific project methodology & support model.

Our key operating principle is that *developing long term relationships with our clients builds trust and that trust builds our relationships. This way of operating makes us both successful.*
